1

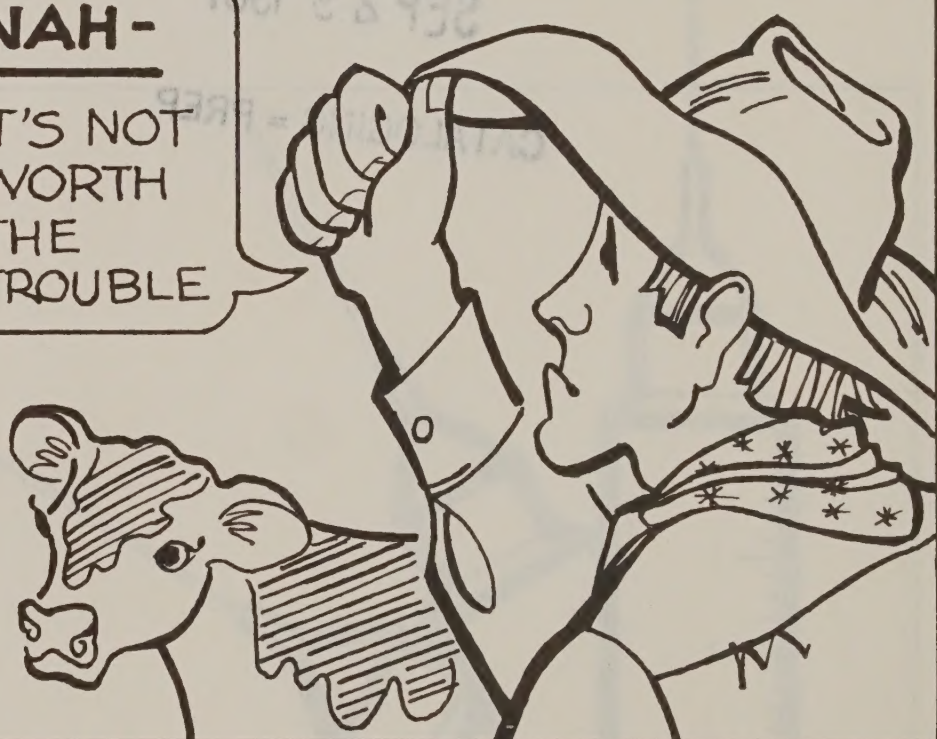

DR. SMITH PAYS JOE A VISIT TO HELP WITH CALVING

2

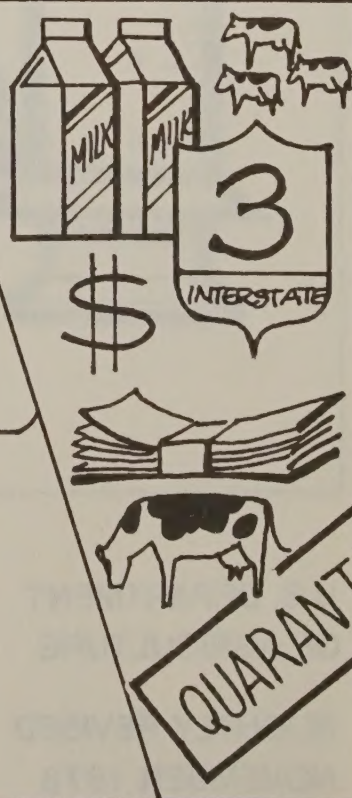

NAH-

IT'S NOT
WORTH
THE
TROUBLE

3

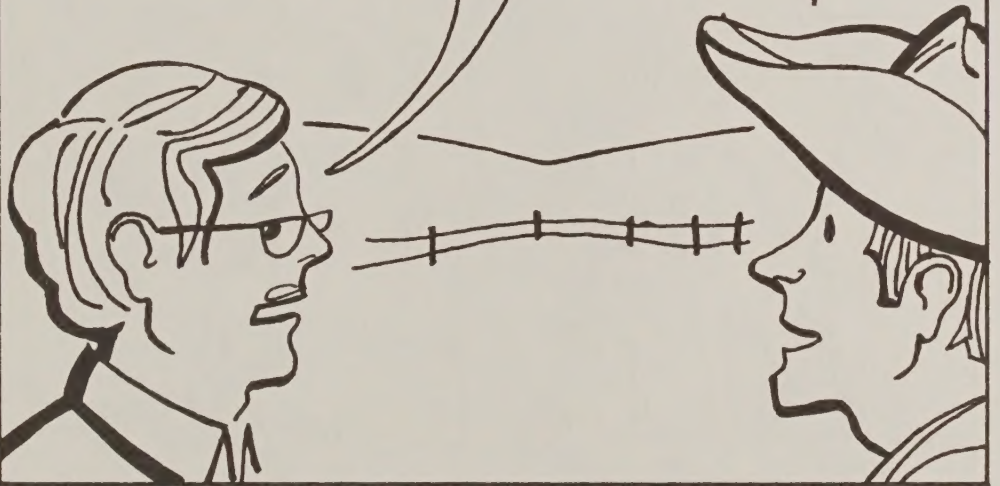

BUT IT'S CHEAP
COMPARED TO
LOST CALVES, LESS
MILK, QUARANTINE,
MOVEMENT RESTRICT-
IONS AND COST OF
GETTING RID OF
THE DISEASE!

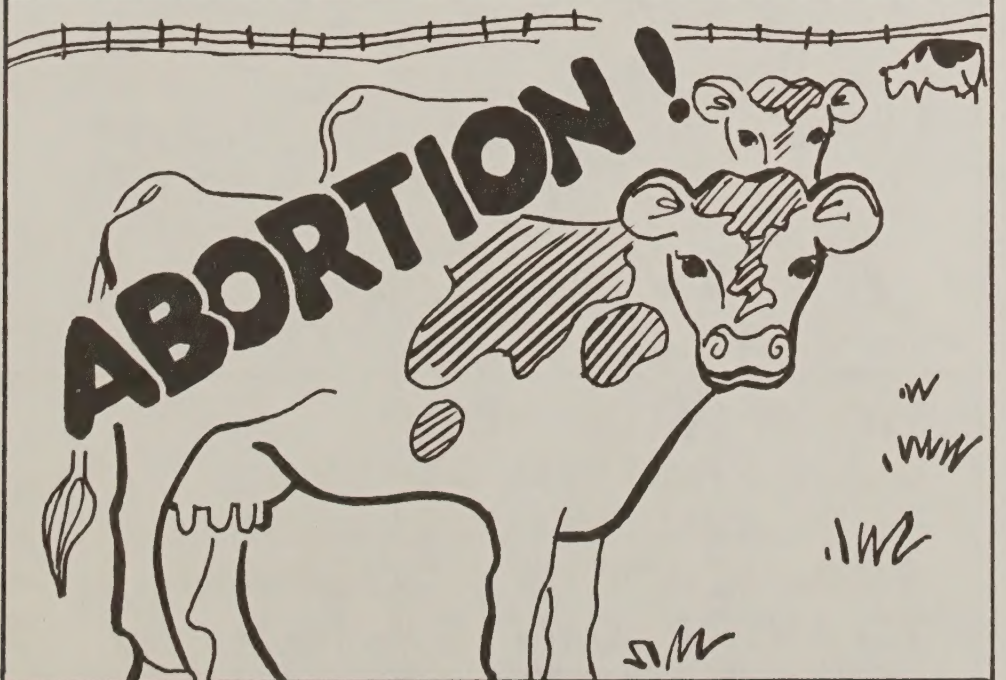

we can't do it

I'LL TAKE MY CHANCES--
PROBABLY SELL THEM
ANYWAY.

SOME STATES
REQUIRE THAT COWS
CROSSING THEIR
BORDERS ARE
VACCINATED; IN FACT,
VACCINATIONS ARE FREE
IN SOME AREAS TO
HELP PRODUCERS FIGHT
INFECTION.
BUT THEY'RE YOUR
CALVES...

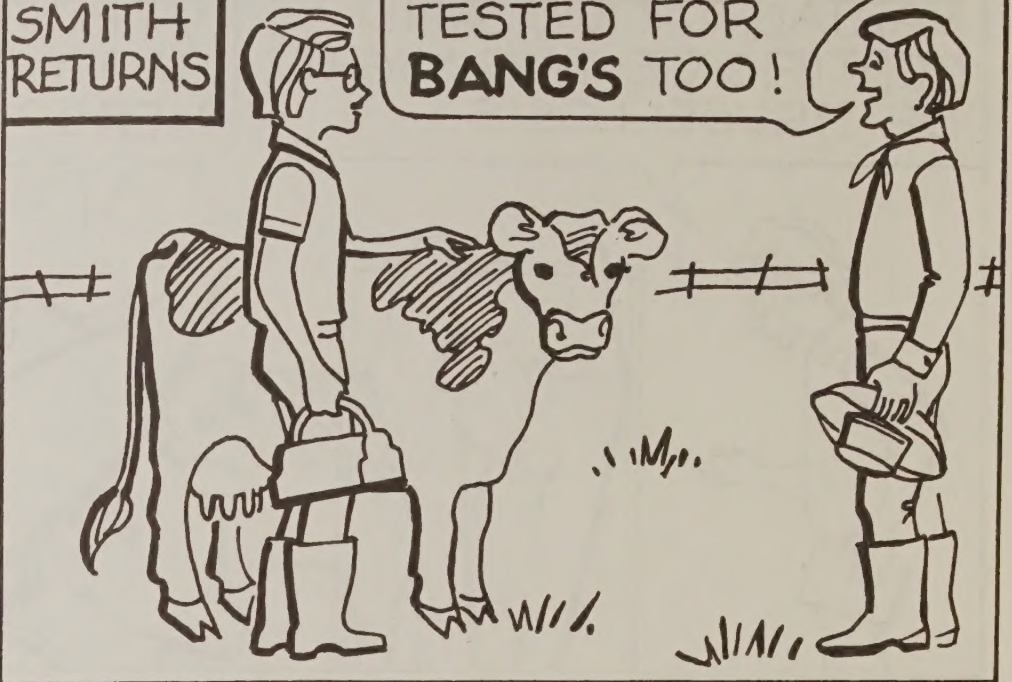

LATER ON, DISASTER STRIKES!

6

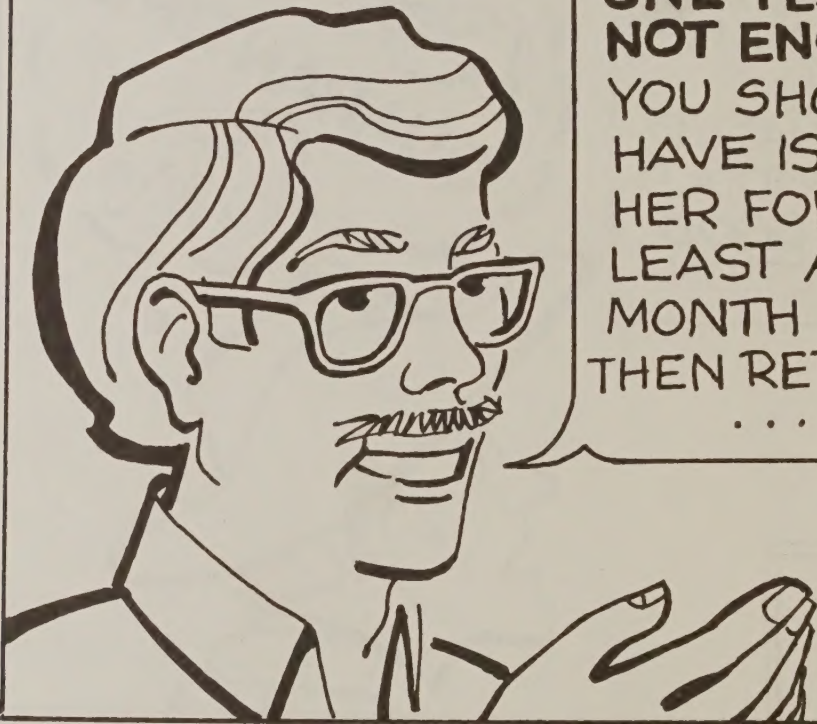

...AND
DR.
SMITH
RETURNS

JUST BOUGHT THIS
COW - SHE WAS
TESTED FOR
BANG'S TOO!

7

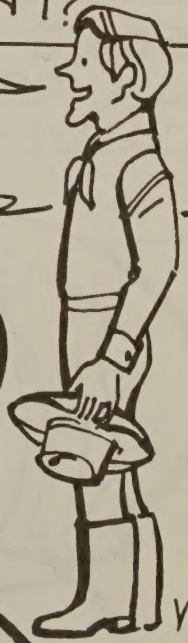

**ONE TEST IS
NOT ENOUGH-**
YOU SHOULD
HAVE ISOLATED
HER FOR AT
LEAST A
MONTH AND
THEN RETESTED
...

8

...AND YOU SHOULD
BUY ONLY CALVES
VACCINATED WITH
STRAIN 19.

HOW DO YOU
KNOW SHE
WASN'T?

9

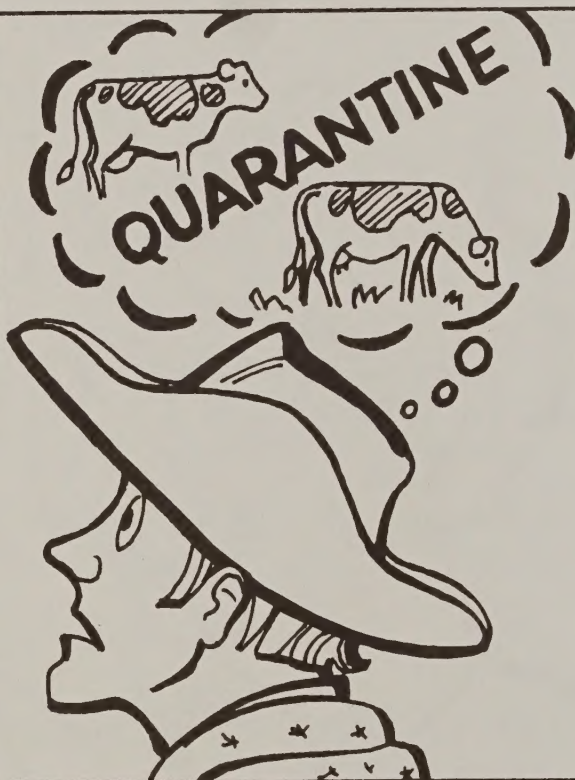

SHE WOULD HAVE BEEN **IDENTIFIED** WITH AN EARTAG, TATTOO AND CERTIFICATE. THIS MIGHT BE BRUCELLOSIS !

IF IT IS, WHAT HAPPENS TO MY HERD?

10

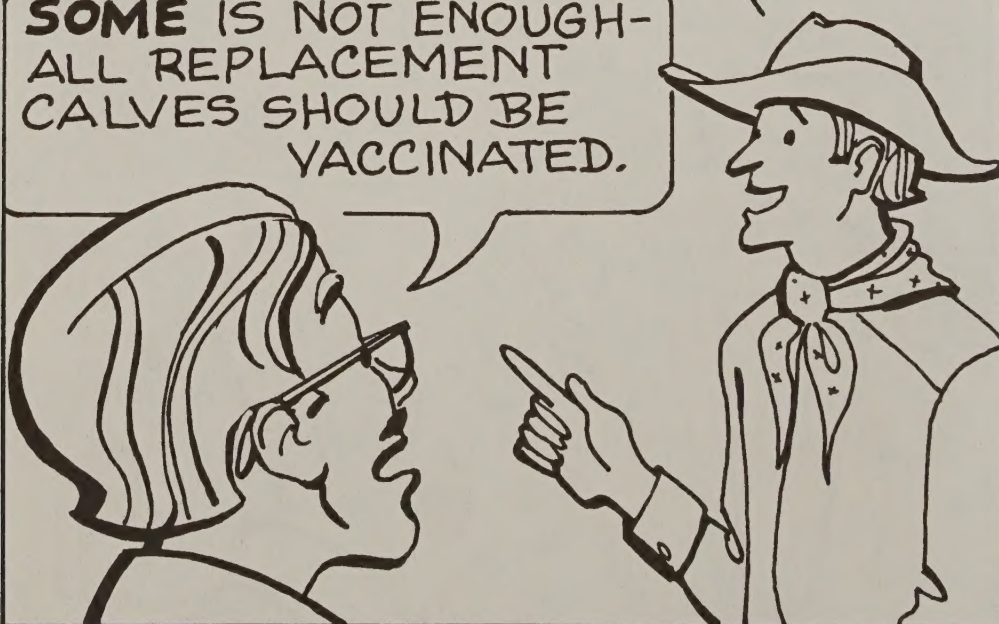

BAD NEWS
QUARANTINE!
IF YOU
VACCINATED,
MOST WOULD
HAVE GOOD
PROTECTION.

11

HEY, I HAD SOME VACCINATED A COUPLE YEARS BACK...

SOME IS NOT ENOUGH-
ALL REPLACEMENT
CALVES SHOULD BE
VACCINATED.

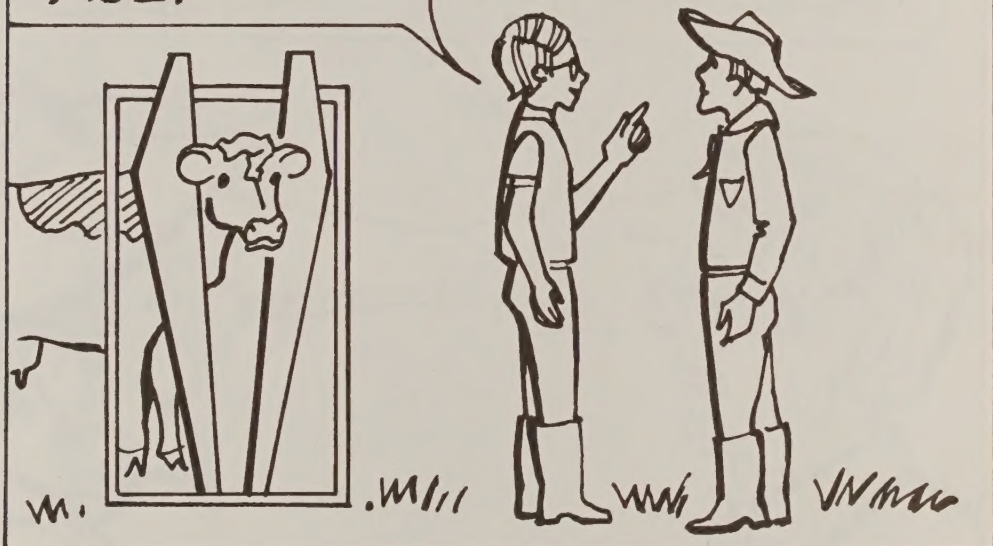

12

WISH I HAD, **NOW**, I'LL VACCINATE **EVERYTHING** IN SIGHT!

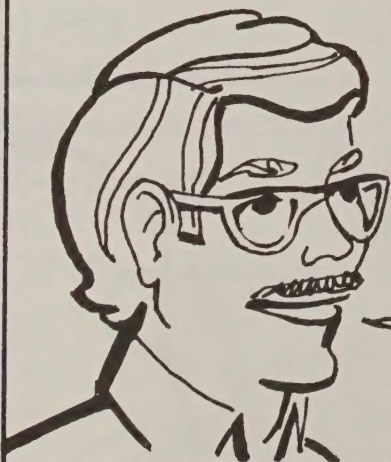

13

WHOA, JOE... **ONLY** HEIFER CALVES. JUST MAKE SURE THEY'RE VACCINATED AT THE PROPER AGE.

14

REMEMBER, CALFHOOD VACCINATION AND GOOD HERD MANAGEMENT MEAN BETTER PROTECTION FOR YOUR CATTLE.

WORK WITH YOUR COOPERATIVE STATE - FEDERAL BRUCellosis ERADICATION PROGRAM TO WIPE OUT BANG'S.
